

## **Instructions for Mix Tape Assignment**

**Due by Midnight April 11<sup>th</sup>**

The intention of this assignment is for you to connect what you have learned in this class to the music that speaks to you. Pick at least one, but no more than two, musical selections that you believe represent the concepts explored in each of these four groups. The terms in each group below are only an attempt to provide catch phrases or trigger words that represent the content we read and discussed.

### **Group 1: Module 1 – Social Welfare Policy: The Definity and the Goals**

The Polis concept of political society – The Polis model requires community and a shared understanding of the common good.

The Definition of Liberty – We use the word, but what is our meaning?

Equity and Efficiency was also part of this module, but you already did a Policy in Real Life Video on those.

### **Group 2: Module 2 – How Problem Definition Drives Policy Formation**

Schulman began our conversation of how change is made.

Stone talked about symbols and numbers and how they are used. Single words speak unstated sentences. Stories that solicit emotion. Persuasion filled with ambiguity.

We also began our discussion of the link between technology, policy and democracy

### **Group 3: Module 3 – Social policy and Social Problems**

Health care discussions, and the impact of COVID on our culture

The war on science and it's role in emerging autocracy

Older adults and policy – the importance of history and the common good.

You should use whatever site you are familiar with to create your playlist/ mixtape. Some examples are YouTube, amazon music, apple music, Spotify, etc. What you will be submitting for the assignment is a link to your playlist.

If you have any questions, let me know.
